Cloudy	Cloudy	Dull	Light rain	Light rain	Drizzle
Precipitation probability					
20%	20%	30%	40%	60%	70%

Forecast for Friday 06 May 2022

Weather: A cloudy day across the Brecon Beacons with the chance of a few brighter breaks, most likely in the east during the morning and perhaps early afternoon. An increasing risk of rain from late afternoon and evening, though clearing south by the end of the day.

Chance of cloud-free hill tops above 600m: 20-30% west, 40-50% east, decreasing to around 10-20% through the evening.

Low cloud and visibility: Extensive cloud at first with bases around 400m will lead to poor visibilities. However, the cloud may lift above the summits at times in the north and east during the morning and early afternoon, allowing the visibility to improve to good or very good. Later in the afternoon and through the evening the cloud bases will be extensive around 300m and visibility will reduce to poor or very poor as the rain moves through. Improving a little by the end of the day.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

A rather mixed day with a chance of high UV levels across the north and east of the Brecon Beacons where the cloud does break, but conditions will quickly deteriorate as rain moves in from the north later in the afternoon.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Thu 05 May 2022	0mm	1.4mm	1.4mm

Forecast for Saturday 07 May 2022

Weather: Clearing skies during the early hours may allow some valley fog to form but this will quickly clear as the sun rises. Then a dry day to some with plenty of hazy sunshine.

Maximum wind: Northerly 10, gusting 15mph.

Chance of cloud-free hill tops 600m: 80% during the early hours, then 100% through the day.

Low cloud and visibility: Patches of cloud around 400m clearing during the early hours, so moderate visibility at times. Then very good visibility for much of the day.

Temperature: **Valleys:** 4 Celsius rising to 21 Celsius by mid-afternoon.
At 600m: 6 Celsius, rising to 12 Celsius by mid-afternoon. 7 Celsius by evening.
Freezing level: Above the summits.
